Time & Place Event Solutions have been assisting organisations with their events for more than 20 years. We have worked with regional and metropolitan clients on a wide range of events including exhibitions, gala dinners, incentives, conferences and product launches. Our passion is working with regional clients promoting events locally and nationally. We run our events responsibly and we're mindful of making events sustainable in every sense of the word.

We all know how organic events can be – they continually grow and change during the planning stages and, if nurtured properly, finally bear fruit for all relevant stakeholders. We work creatively and collaboratively to make the planning pleasurable, the delivery dynamic and the time and place memorable.
